To Whom It May Concern:

I volunteered to write this letter on behalf of Baseman Bros. Inc., of Germantown, WI, because I am so pleased with the job that they recently completed on our high school gym. I have known Mr. Jeff Baseman, president of the company, since they did the initial install on our high school gym floor 20 years ago, and I believe I am very qualified to comment on his company.

In the summer of 2011, I contracted with Mr. Baseman to refinish our high school gym floor. The contract price was well below that of other companies, and Baseman's price included additional graphics that were not in our original specifications. The floor turned out better than we expected and was completed on time despite a very tight schedule.

Over the years I have discussed the work of Baseman Bros. with other administrators throughout our state. Most of them have long-term relations with the company, and because of past experiences, they would never hire another flooring company. Baseman Bros. has been in business since 1926 because of their quality craftsmanship and commitment to service.

You can trust Baseman Bros. to provide excellent craftsmanship and complete your project on time. If this were not the case, I would not put my reputation at stake by writing this letter. I recommend that you give any proposals you receive from Baseman Bros. your utmost consideration.

If you have questions, please feel free to give me a call.

Very truly yours,

Handwritten signature of Dr. George J. Karling.

Dr. George J. Karling
District Administrator
